

# CHIMNEY PILLOW

## SPECIFICALLY FOR LOG BURNING STOVES

### PRODUCT FEATURES AND BENEFITS

#### Features:

- Designed specifically for 6 inch flues
- Allows a little ventilation up the flue
- Easy to inflate and deflate
- Easily positioned within the flue, no tools required
- Comes complete with a two foot mouth inflation tube

#### Benefits:

- Stops downdraughts and up draughts
- Stops debris, soot and bird mess
- Inflate to install, deflate to remove
- Allows a little ventilation
- Easy to install and is reusable
- Completely safe, when heated it shrivels up

#### Description

The Chimney Pillow is the simple, cost-effective way to stop chimney/flue draughts, reduce noise and heat loss. Easy to install and remove, it is made from a special laminate of three poly plastics making it airtight, tear-resistant and long lasting.

#### Purpose

To reduce hot air escaping up and cold air coming down a chimney, thereby reducing heating bills and making the room more comfortable. Especially useful for use in the summer months, when the log burner is not often in use but will be a source of drafts and therefore reduce the temperature of the room.

Single unit with one 2 foot inflation tube, RSP £24.99

# CHIMNEY PILLOW

## STOPS CHIMNEY DRAUGHTS

## SAVES HEATING COSTS

FOR WOOD BURNING & MULTI FUEL STOVES

- Stops down draughts and up-draughts
- Inflate to install, deflate to remove
- Allows a little ventilation
- Easy to install. Reusable
- Completely safe, shrivels up if heated
- Stops debris, soot and bird mess

### How It Works

<p>Cold Air Sinks</p>  <p>Warm Air Escapes</p>	<p>Cold Air Held Back</p>  <p>Warm Air Does Not Escape</p>
---	---

The Chimney Pillow is made from special, durable long life plastic. Just inflate to block the chimney. Cold air is held back, warm air does not escape so you save heat and money.
