PEACOCK

POWERplus® Peacock

Solar powered GARDEN LIGHT

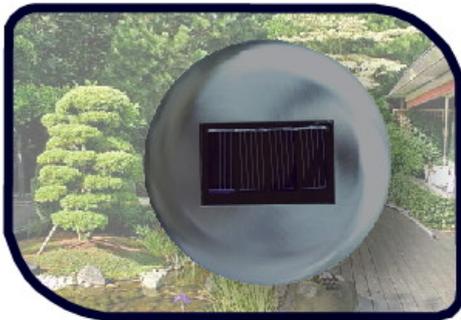

POWERplus introduce to the Home & Garden line, the Peacock, a solar powered garden light with inbuilt daylight sensor for automatic on/off control.

The high quality materials used ensures a long lifetime and excellent performance.

The integrated solar cell on the top of the light generates energy during daytime and charges the internal battery. At night this energy is used to power the light.

This high quality, high performing light out performs most other solar lights you can find on the market. The POWERplus brand guarantees excellent performance and durability.

High efficiency solar cell

Stainless steel construction

Inbuilt daylight sensor for automatic on/off

Technical details

Main material	Stainless steel SUS304
Lifetime LED	Brightness 18.000 MCD
Battery	Rechargeable 600 mAh Ni-MH AAA size
Lighting time 10 hours charge	Around 20 hours
