FLASHLIGHT - POWERBANK

Waterproof 3W LED

High performance in a compact size. That's the POWERplus Salamander. The Salamander combines a high performance 3W LED flashlight with a 2.400 mAh powerbank. Made from high quality components, the Salamander has excellent performance in both lighting and charging.

Release the watertight bottom cap and find a micro USB charging in port and a USB charging out port. Connect your mobile device (USB rechargeable) like mobile phone, GPS, PSP etc. with the USB charging cable of this mobile device and juice up your mobile device battery.

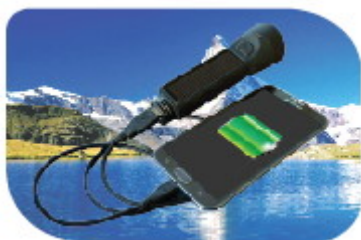

The design of the Salamander is constructed in a way that however you place it on a flat surface, the solar cell will always turns up, so it can charge using solar power.

Ultrabright 3W waterproof LED

2.400 mAh Lithium powerbank

Charging mobile phones

0.25W solar cell with indicator

Technical details

Battery	3.7V / 2.400 mAh Lithium
Charging time by solar	45 hours
Charging time by USB	5 hours
Lighting time high brightness	7 hours
Lighting time normal brightness	12 hours
Solar panel	0.25W
Output	5V / 0.5A
Input	5V / 0.5A
