TRITAN MATERIAL**

**TUNA**

# POWERplus® Tuna

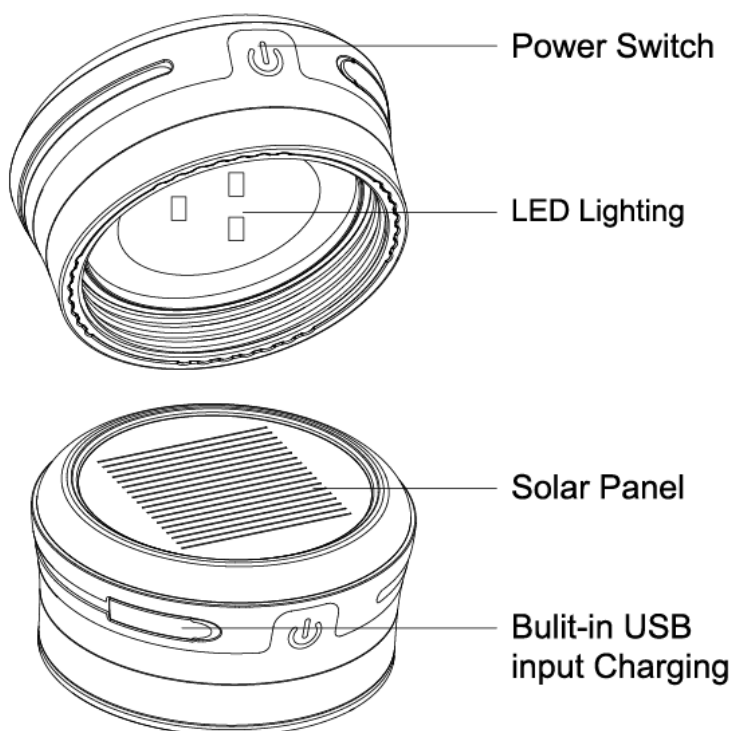

Solar – USB powered  
WATER BOTTLE LED LANTERN  
Tritan Material

The POWERplus Tuna combines a Tritan material water bottle with a solar /USB powered LED lantern.

Besides as a light, the Tuna can also help to disinfect water by using SODIS-method (Solar Disinfection). Fill the Tuna with water and set out in the sun for 6 hours. The UV-A rays in sunlight kill germs such as viruses, bacteria and parasites (giardia and cryptosporidia).

A nice gadget for outdoor, hiking, camping etc.

### Technical details

Battery	3.7V, Polymer Li 480 mAh
Charging time by solar	25 hours
Charging time by USB	2.5 hours
Lighting time high brightness	2 hours (100Lm)
Lighting time normal brightness	6 hours (50 Lm)
Lighting time low brightness	10 hours (20 Lm)
Max. input	5V / 360 mA
Input	5V / 0.5A
Waterproof	IPX7
Bottle capacity	600 ml
